Phase-1 Practice Project: Assisted Practice

9. Demonstrate Auto IT Installation and Configuration.

1. Download AutoIT from https://www.autoitscript.com/site/autoit/downloads/ link.

2. Then on the same page you will click on AutoIt Script Editor to download.

3. Go to downloads→autoit-V3-setup-zip-folder→ right click→Extract all→Install.

4.Install SciTE4Autoit3.

5. Then on windows machine search for editor-> SciTE

6. It will open the editor:

   to write the script.

   Once the script is ready, save the script on your windows machine

   Right click on the script --> click on Show more options and select compile the script.

   A compiled file will be available in the folder.

   This compiled file will be executed in selenium script

7. To find the element--> on windows machine --> search for tool AutoIT windows info -->

   open it

   drag the finder tool on the text box. It will show details in box.
