# Phase-1 Practice Project: Assisted Practice

## 8. Demonstrate how Browser Profiles are changed in selenium.

- First , close the Firefox if it is open.

- Open Run (Windows + R) and type firefox.exe -p and click OK.

- A dialogue box will open named "Firefox -choose user profile."

- Select the option "Create Profile" from the window, and a Wizard will open. Click on Next.

- Provide your profile name which you want to create, and click on the Finish button.
